

CNS gateway ICS UK Edition is a web-based solution which provides reliable, high performance messaging options for filing Entry Summary Declarations (ENS) to HMRC UK ICS under the European Union (EU) Import Control Regulations.

Benefits of using CNS gateway ICS UK Edition:

- High performance messaging link to UK ICS.
- Visibility of message status.
- 24 hours, 7 days a week help desk support.
- Create and manage your ICS declarations in a simple browser application (full and minimal field options available).
- CUSCAR and Microsoft Excel (.xls) file formats supported.

CNS gateway ICS UK Edition is a secure system accessible across the public internet, virtual private networks (VPN) or private networks. So, if you are already using CNS Compass or CNS Air Courier then you can already access CNS gateway ICS UK Edition. If you are not currently using a CNS service then you can choose the connection option to suit you.

CNS gateway ICS UK Edition includes a simple browser application for keying and managing ICS declarations, amendments, arrivals and diversions. Using the Microsoft Excel spreadsheet upload facility, users can create and manipulate the data for multiple entries within a familiar tool. Contact CNS for a sample template.

If your freight management software includes ICS functionality, it will probably already be able to access CNS gateway ICS UK Edition - check with your software house. If you use bespoke freight management software you will find the CNS gateway ICS UK Edition interface quick and easy to implement.

If you require connectivity to all of the member states of the European Union, please refer to CNS gateway ICS Europe Edition.

CNS gateway ICS UK Edition supports all ICS messages, including:

- Entry Summary Declarations (IE315)
- Amendments (IE313)
- Diversions (IE323)
- Arrivals (IE347)
