

CNSgateway ICS

UK Courier Edition

Enabling your ICS compliance

CNS gateway ICS UK Courier Edition is a web based solution designed to meet the needs of the couriers who are filing entry summary declarations (ENS) under the European Union (EU) Import Control Regulations.

Benefits of using CNS gateway ICS UK Courier Edition:

- Accredited with major airlines for third party declarations by couriers. Avoid airline ICS charges.
- Simple and quick registration process with airlines and UK HMRC ICS system.
- Fully supported messaging links to other UK HMRC ICS system.
- Create and manage your ICS declarations in a simple browser application, or use a full feature application from our partners.
- Microsoft Excel (.xls) file formats supported.
- Receive airline alerts for missing declarations.

CNS gateway ICS UK Courier Edition was designed in partnership with airlines and the courier community to provide a cost-effective solution for couriers. It is a secure system available over the public internet and is suitable for use whenever and wherever you need it.

CNS gateway ICS UK Courier Edition ensures that all declarations meet airline requirements for critical data items: CBV or AWB numbers, entry key and carrier EORI number. Any failures are reported back to users for rapid correction. CNS gateway ICS UK Courier Edition also supports airline alerts for missing declarations (when available from the airline) providing an integrated view of all declarations and alerting users of potential compliance failures.

CNS gateway ICS UK Courier Edition includes a simple to use web application for keying and managing ICS declarations and amendments. The web application includes a Microsoft Excel upload feature for users to prepare ICS declarations within a Microsoft Excel spreadsheet. Contact CNS for a sample template.

For customers requiring a full feature entry build solution, CNS has partnered with specialist software providers. All declarations pass through the messaging gateway which is fully supported by CNS. If you already have software with ICS functionality, check with your supplier for connectivity to CNS. CNS also welcomes connections from bespoke solutions.

Customers who have shipments from outside the EU landing at member states other than the UK will require connectivity to those member states. Please refer to *CNS gateway ICS Europe Courier Edition*.
