

CNSgatewayICS

Europe Edition

Enabling your ICS compliance

CNS gateway ICS Europe Edition is a web-based solution for filing Entry Summary Declarations (ENS) with connectivity available or planned for all member states in the EU.

Benefits of using CNS gateway ICS Europe Edition:

- Suitable for carriers and third party declarants.
- Fully supported messaging links to all member states in the EU (as connectivity becomes available).
- Consistent user interface for all member states, improving productivity and reducing training costs
- Comprehensive data validation, with rules tailored to each member state.
- Option to submit declarations in single XML format for all member states.

CNS gateway ICS Europe Edition is a full-feature, web-based solution for filing ICS entries to member states across the EU. For details on current and planned availability, please contact CNS. *CNS gateway ICS Europe Edition* provides a consistent, intuitive user interface that incorporates the varying requirements of both different modes of transport and individual ICS systems. Data validation is tailored to each member state, enabling users to correct errors prior to submitting entries.

Users benefit from visibility of the status of declarations and any exceptions through a user-defined dashboard, helping customers to maximise their compliance. The centralised data store provides an archive and audit trail to assist in responding to queries from regulatory authorities.

If you are using package or in-house software to create Entry Summary Declarations, you can send the declarations to *CNS gateway ICS Europe Edition* in the same XML message structure for all member states. Please contact CNS for details of the message layout and connectivity options.

CNS gateway ICS Europe Edition supports the following messages:

- Entry Summary Declarations (IE315)
- Amendments (IE313)
- Diversions (IE323)
- Arrivals (IE347) where available in the member state.
